

Group Challenge

Group Challenge

- In this group challenge, we will divide into small groups of approximate 2 to 3 students in each group.
- Each group will work together to solve the challenge question.
- You will spend about 30 minutes for the challenge and then each group will present their answer by screen sharing.
- The goal of this challenge is to enhance your skills in coding, research, problem solving, team collaboration and presentation.
- You will present and explain your group's codes in this challenge.

Group Challenge

Your Task:

- On this task you are only required to write redux scripts pertaining to the instructions below. You are not required to create a fully functional app.
- Assuming you have an app that has a shopping cart feature that has the following data:
 - PRODUCTS: itemId, itemName, itemPrice, itemDesc, qty
- Shoppers can either:
 - Add item to the cart – doing so will need all product information
 - Update item in the cart – doing so will only need the item id and quantity
 - Delete item in the cart - doing so will only need the item id

Group Challenge

Your Task:

- Write scripts for the following:
 - Define all action types on a separate file named **actionTypes.js**
 - Create various action objects with their respective payload for each action type on a file name **actionCreators.js**
 - Create a *reducer* that takes each action type along with its payload and return a new state by merging with its current state (hint: use spread syntax). Create this reducer in a file name **App.js**

Group Challenge

- Each group to share their solutions using share screen.
- Show your codes in VS Code or CodeSandBox.
- Presenter:

Explain your code concepts used.

The background is a solid light blue color. In the bottom-left corner, there is a decorative geometric pattern consisting of several overlapping shapes: a dark blue square, a medium blue triangle, and a light blue triangle, all arranged in a way that creates a sense of depth and movement.
