

Lab Assignment

Lab Assignment

- This week's assignment will contain two parts:
 - Part 1: Add new features to the Shop 2 React app.
 - Part 2: Start your personal portfolio website.

Lab Assignment – Part 1

- You will add new features to the shopping cart app from last week using React.
- Please make sure you use the files completed from the last lab.
- You are expected to utilize some of the concepts you have learned this week.
- As a web developer, you are also expected to problem solve by doing your own research on concepts and techniques. Give yourself a 10 to 15 minutes to problem solve before asking for assistance.
- For the most part, you should be able to complete this part of the assignment using the acquired knowledge from this and past couple of weeks.

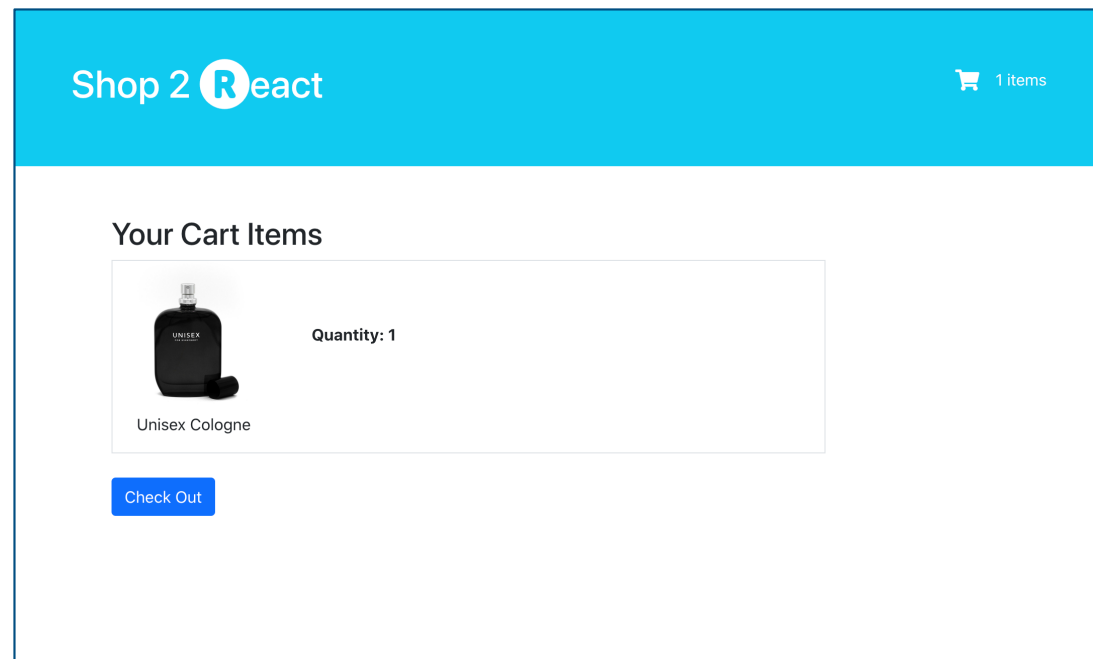

Lab Assignment – Part 1

- A Check Out button appears below the cart item(s).

Note:

PDF also available for download on GAP.

Lab Assignment – Part 1

- Clicking the Check Out button takes user to this sign in screen with FB login option. The title should says Sign In.

Note:

PDF also available for download on GAP.

The screenshot shows a web application interface. At the top, there is a blue header bar with the text 'Shop 2 React' and a shopping cart icon with '1 items'. Below the header, the main content area has a light gray background. A white box with a gray header 'Sign In' is centered. Below the header, it says 'Please login using one of the following:'. There is a form with two input fields: 'Name:' with 'Your name' and 'Email:' with 'Your Email'. Below these fields is a green 'Login' button. At the bottom of the white box, there is a blue button with the Facebook logo and the text 'LOGIN WITH FACEBOOK'.

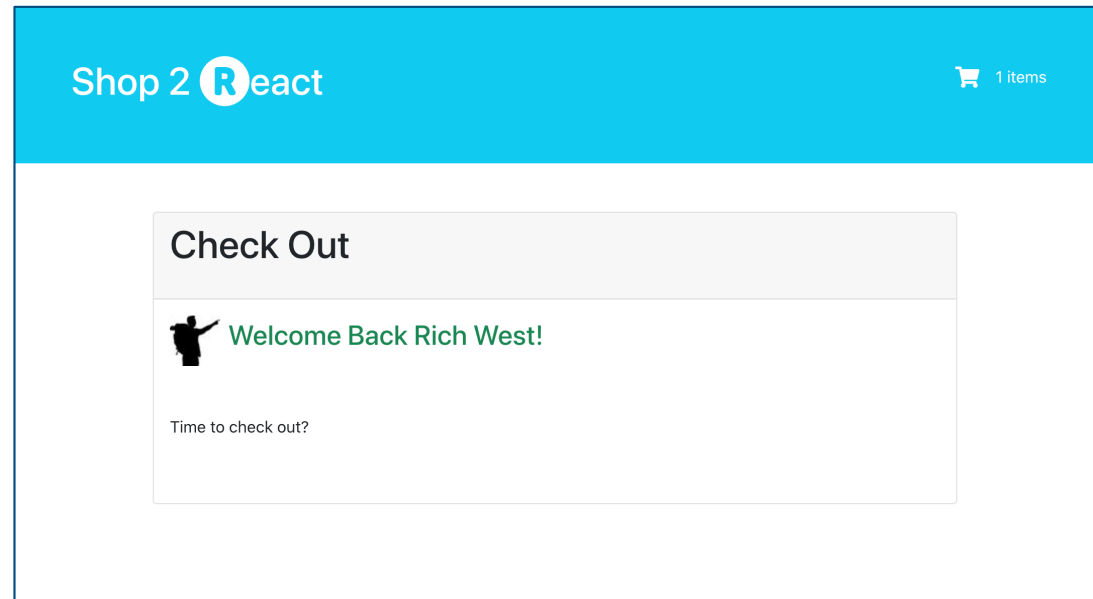

Lab Assignment – Part 1

- Clicking on the FB login button, displays the FB sign in window. After successfully signed in, user is taken to this Check Out screen. The title should says Check Out.

Note:

PDF also available for download on GAP.

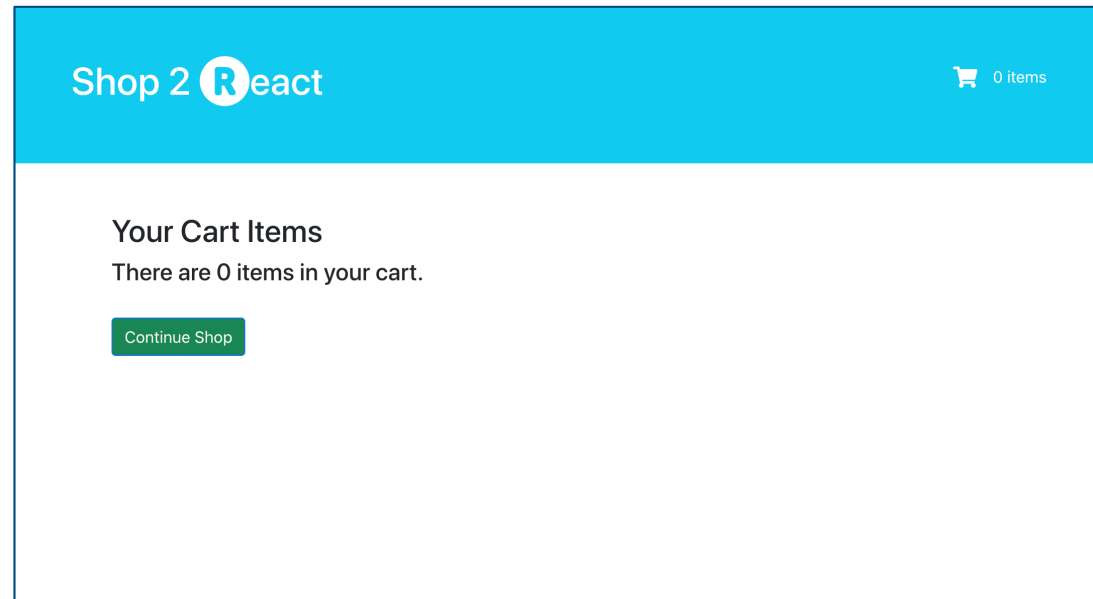

Lab Assignment – Part 1

- If cart has 0 items, the cart screen display a message like this. The **0** in the message is dynamic. Below the message is a Continue Shop button. When clicked, takes user back to the shopping screen. Notice Check Out button is not available if cart is empty.

Note:

PDF also available for download on GAP.

Lab Assignment – Part 1

- Some useful tips:
 - Use ternary operator instead of standard if-else to return components.
 - You can use `React.Fragment` in ternary operators.
 - Remember: if creating new components, it won't return data unless data is passed from the calling of this component.
 - Not every data is passed from the products state - if the data is created outside of it. Example: `totalValue`.

Lab Assignment – Part 1

- Here are your tasks breakdown:
 1. Add Check Out button.
 2. Implement OAuth FB login.
 3. Add Check Out screen.
 4. Modify scripts so Check Out button only display if cart is not empty.
- Make sure part 1 is pushed to Github (commit #3).

Lab Assignment – Part 2

- In Part 2 of this assignment, you are task to start your personal portfolio website.
- This website is a web shell to showcase all your projects from this Bootcamp.
- A portfolio website typically have these characteristics:
 - Your personal logo (can be icon based or text based or both). This is part of your personal brand.
 - Your professional title.
 - Short bio.
 - Screenshots of your projects, each linked to a live demo.
 - Resume (can be display within or as a PDF download or both).
 - Contact information including a simple contact form.

Lab Assignment – Part 2

- Why is it important to have a portfolio website?
 - Because all your projects can be organized and viewed/linked from within one unified place.
 - You can easily send the URL via email, chat/text messages, social media, resume.
 - Get notice! Broadcast/market yourself as a developer. Create your own brand!

Lab Assignment – Part 2

- Where should you start? You have couple of choices:
 1. Find a ready made portfolio template. Recommended that you use templates that is build using front end technologies you learned from this Bootcamp such as Bootstrap, ReactJS or VueJS.
Pros: Quick
Cons: Generic/common, backward engineering which takes time
 2. Build your own. What better way to show a portfolio site than as one of own projects. Employers will be impressed!
Pros: Built to your liking, full control from ground up
Cons: Takes time
- Note:**
Backend server (MongoDB) is not required for portfolio websites.

Lab Assignment – Part 2

Shell means no content in it yet. You can put placeholder content for now if you wish.

- Expectation of this Portfolio Site
 - You are expected to spend no more than 3 weeks to finish the **shell** of the site.
 - Coded with HTML/CSS/JS, Bootstrap, React or Vue.
 - The shell would have been customized in its design (layout, color, fonts) to your taste and brand.
 - The shell of the site may not have any of your personal content yet at this time.
 - The fully completed site should be ready for presentation at the end of Module 6. By then:
 - Projects should be linked and display live on the web along with Github links.
 - The portfolio site should be live on the web.
- Tips:
 - Avoid using heavy animations on your site. The focus is on your projects not the distractions.
 - Keep the site simple and to the point. The less bandwidth it takes up the better!

Lab Assignment – Part 2

- What you need to do in lab today:
 - Research
 - Templates – Bootstrap, React/VUE
 - Review Bootstrap, ReactJS/VueJS concepts
 - Portfolio site layout/design ideas
 - Gather assets
 - Personal logo, screenshot of projects you want to showcase on the site, prepare bio
 - Research/download/write Bootstrap, React/Vue library components you want to integrate onto the site.

Lab Assignment – Part 2 Resources

- Some places to help you start template search:

 - <https://codesource.io/building-a-portfolio-website-with-vue-and-bootstrap/>

Lab Assignment – Part 1

- **DUE:**

By End of Today, 10.30PM PT.

- **Submission:**

None for Part 2 today.

You are only required to turn in Part 1

Post Github URL (with commit #3) on GAP Week 3 Day 3 Lab Assignment

Lab – Quiz

- We prefer you take the quiz while you are in lab today.
- Otherwise, you have until tomorrow Sunday (end of the day) to take it.
